

# **ANTENNAS AND WAVE PROPAGATION**

## **LAB ASSIGNMENT 6**

### **EXPERIMENT 6**

**NAME: RAHIL SHARMA**

**PRN: 18070123062**

**BATCH: 2018-2022**

**DIVISION: G2; EA 3**

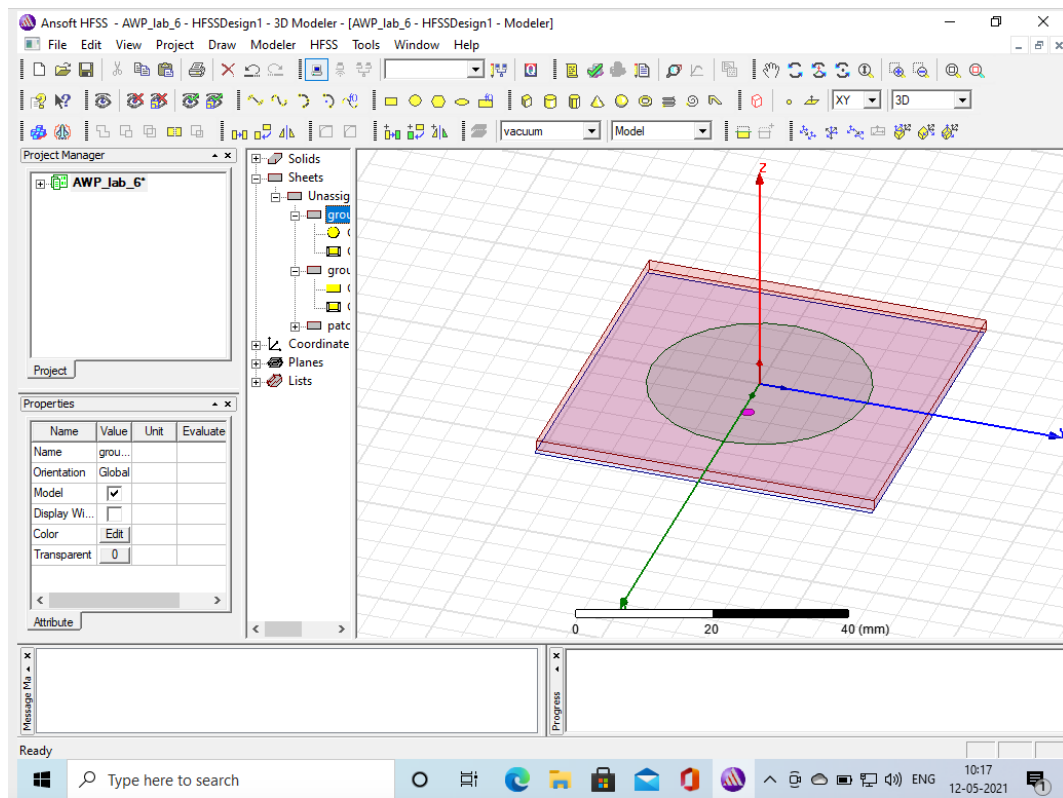

**AIM:** Design a circular MSA with coaxial feed to resonate between 2 -2.5 GHz.

**THEORY:** The antenna acts a transducer by converting electric currents to EM-waves in transmission, by converting EM-waves to electric currents in case of reception of signal.

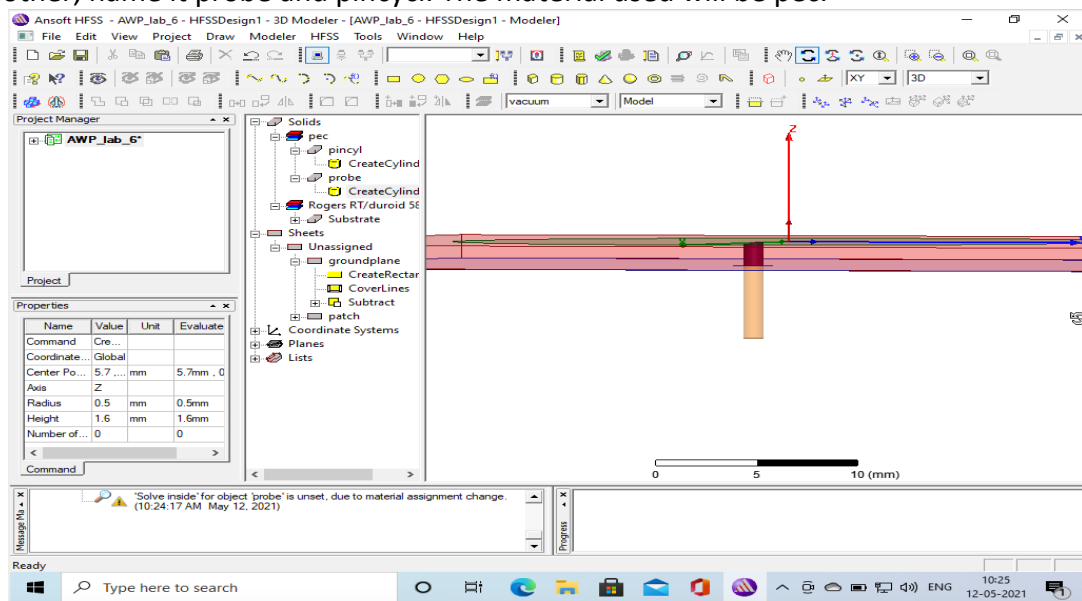

The Coaxial feed or probe feed is one of the most common techniques used for feeding microstrip patch antennas. As seen from figure, the inner conductor of the coaxial connector extends through the dielectric and is soldered to the radiating patch, while the outer conductor is connected to the ground plane.

## **PROCEDURE AND SCREENSHOTS OF THE DESIGN [IN BRIEF]:**

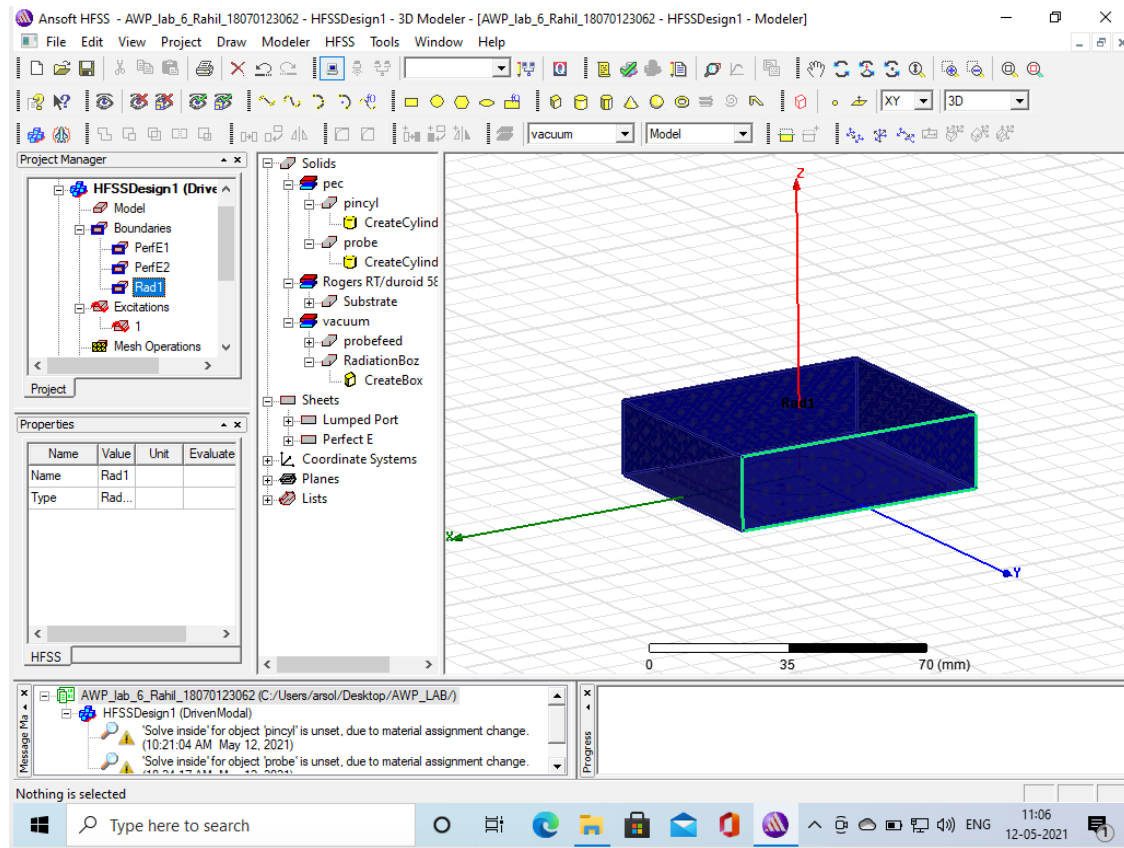

1. The antenna will be of 2.4 GHZ.
2. We will first design a Substrate Box. Then we give the dimensions to it which were calculated by Co-Axial Feed Calculator. The material used will be Rogers RT.
3. Then we design the Ground layer of the design in a circular shape.
4. Then we design the groundcut a smaller radius circular shape on top of our Ground layer.

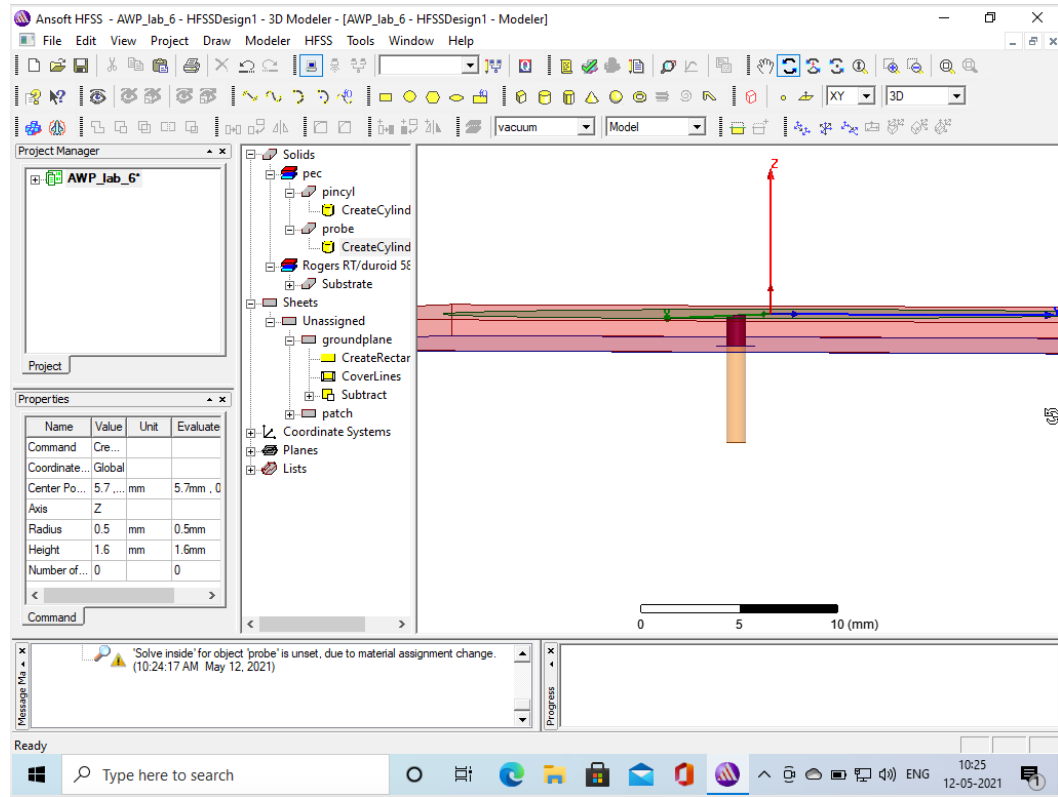

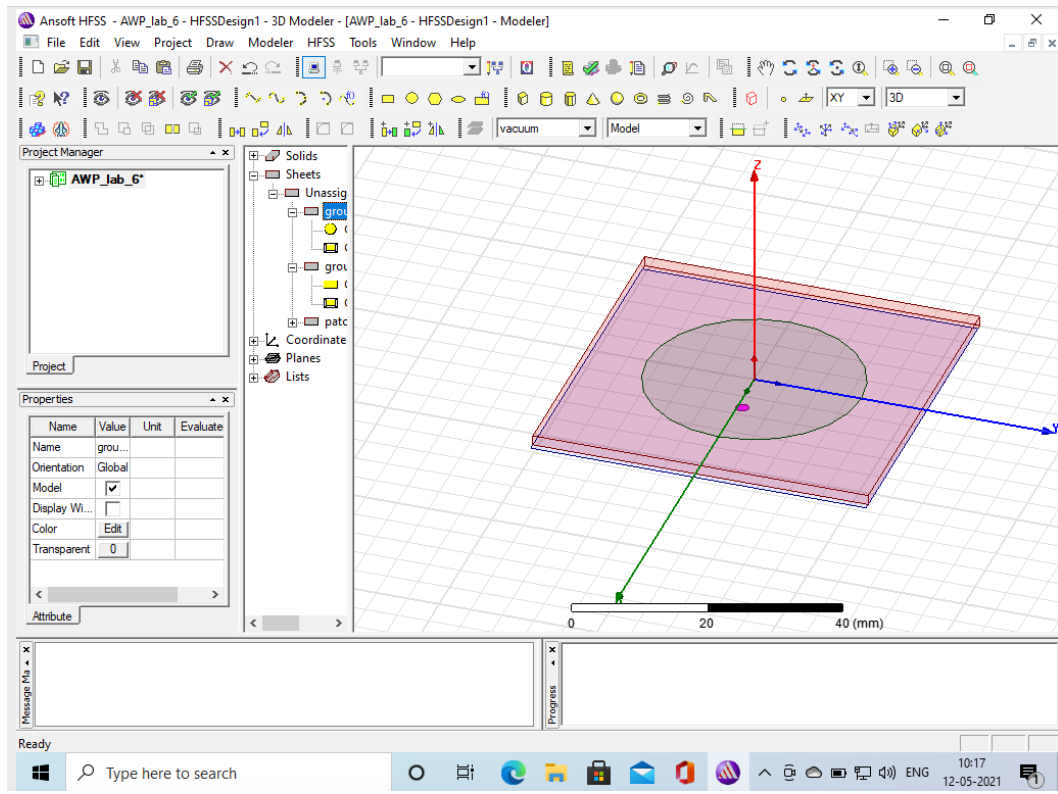

5. Now we select ground and groundcut layer and subtract it.
6. Now in the missing slot of the groundcut layer we will insert two cylinders upon one another, name it probe and pincyl. The material used will be pec.

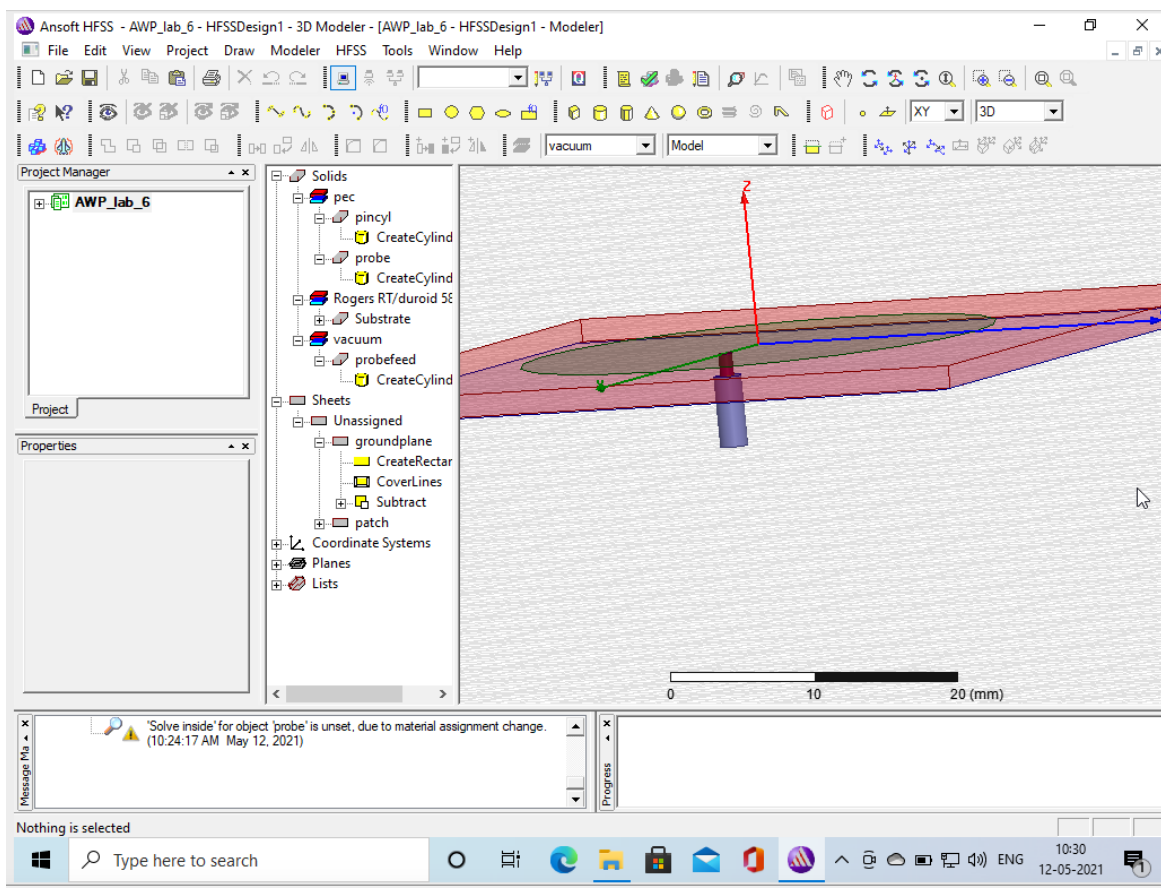

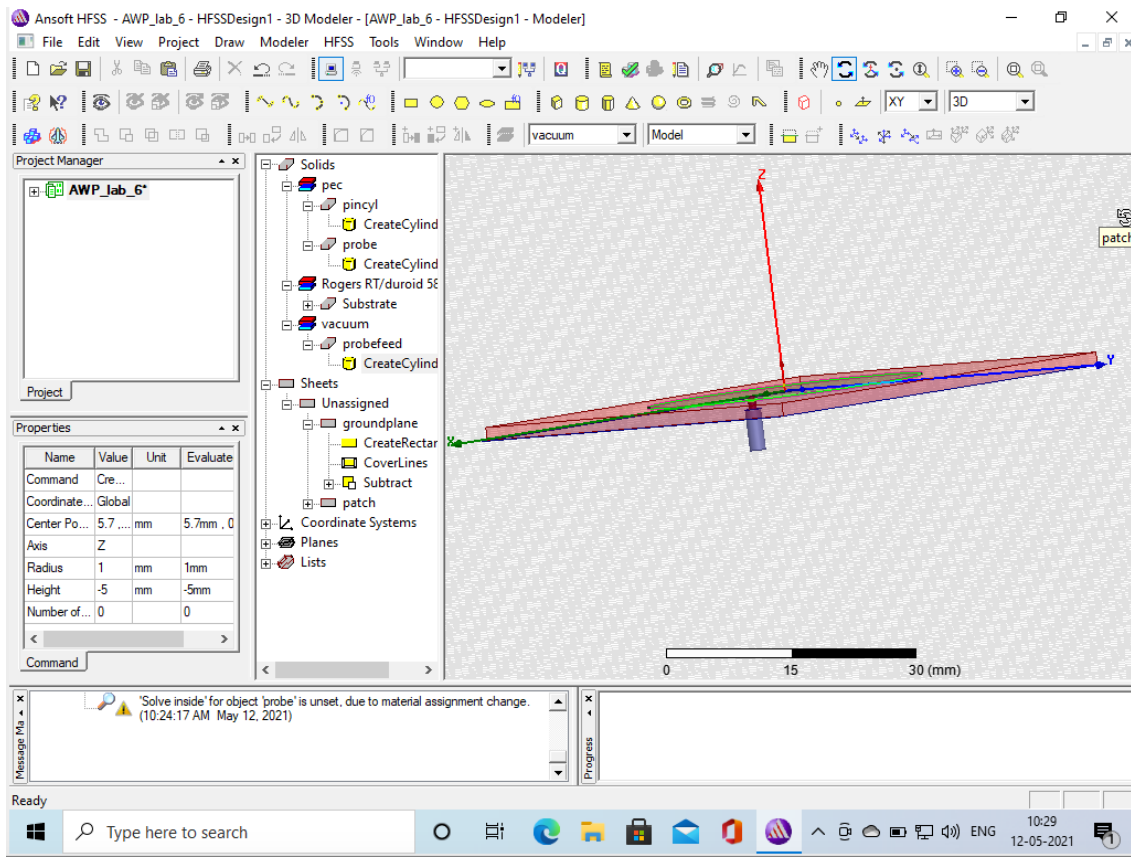

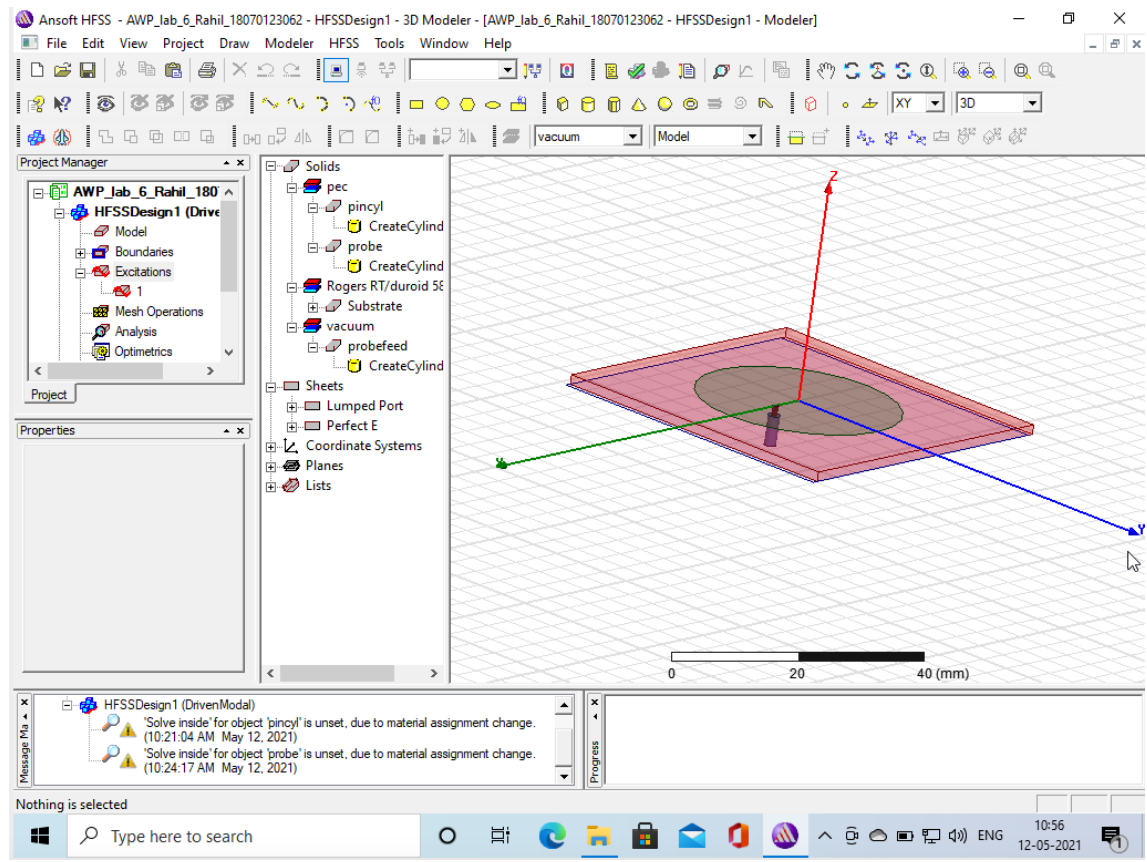

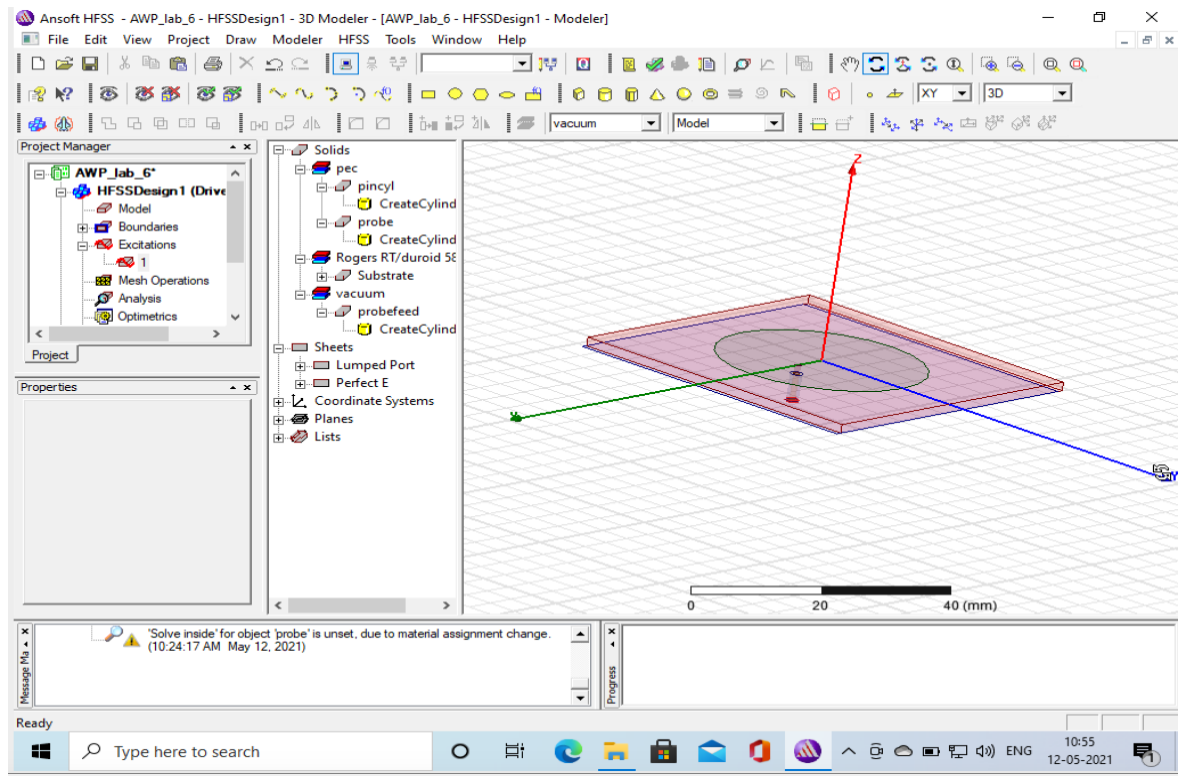

7. After the two cylinders we will then create a 3<sup>rd</sup> Cylinder and name it probe feed from which we will give the co-axial feed to the antenna.
8. Then we will right click and provide excitation to the probe feed of the antenna. We have provided Lumped Port to the Probe Feed layer.
9. Then we select all the faces and provide Radiation to the Antenna.
10. Check for Validation Check and inset a solution analysis to the design.

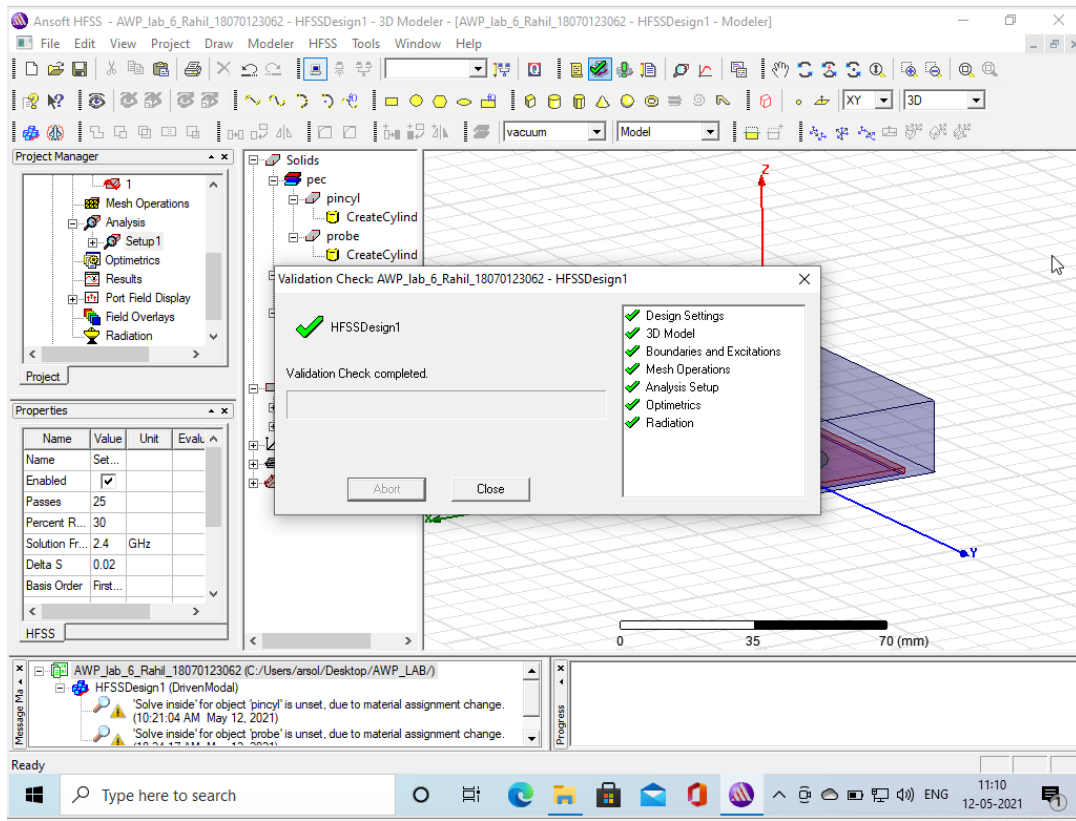

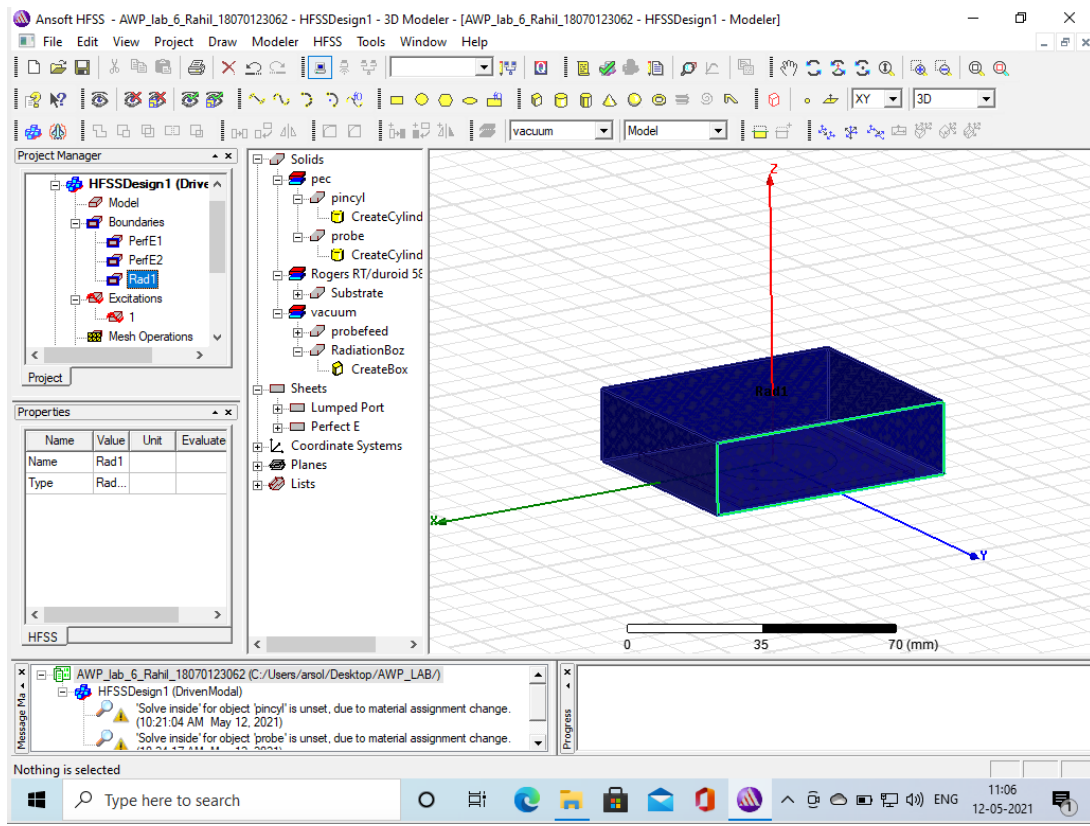

## FINAL DESIGN SCREENSHOTS:

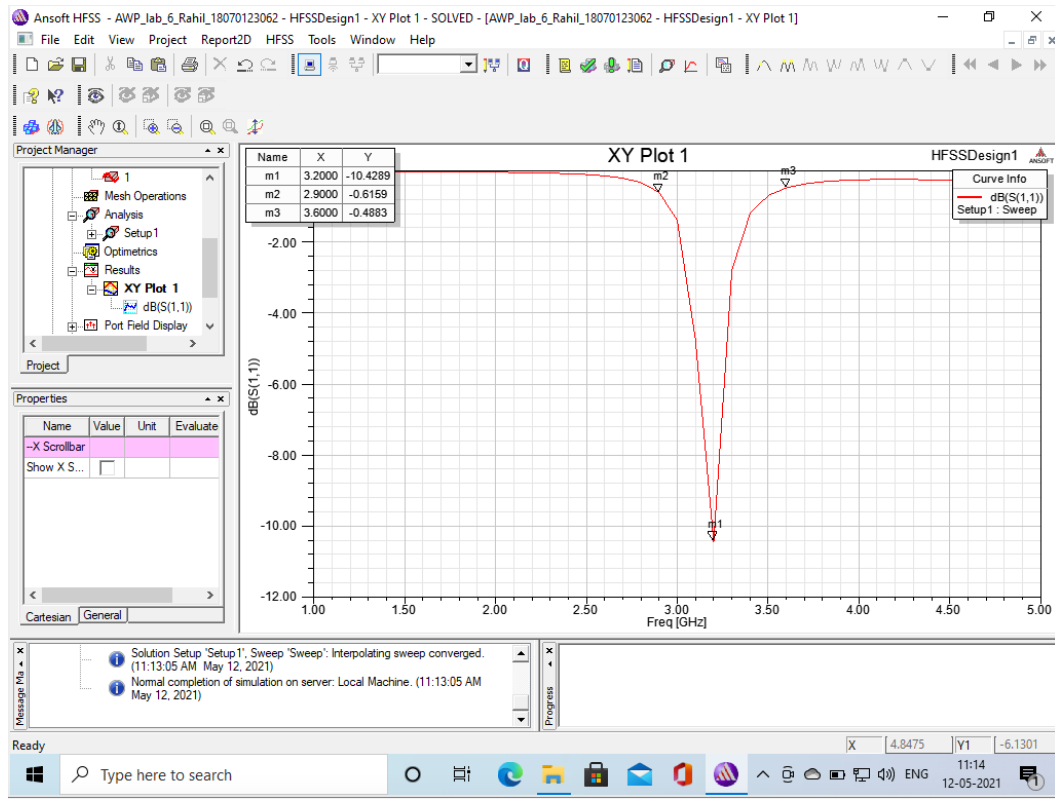

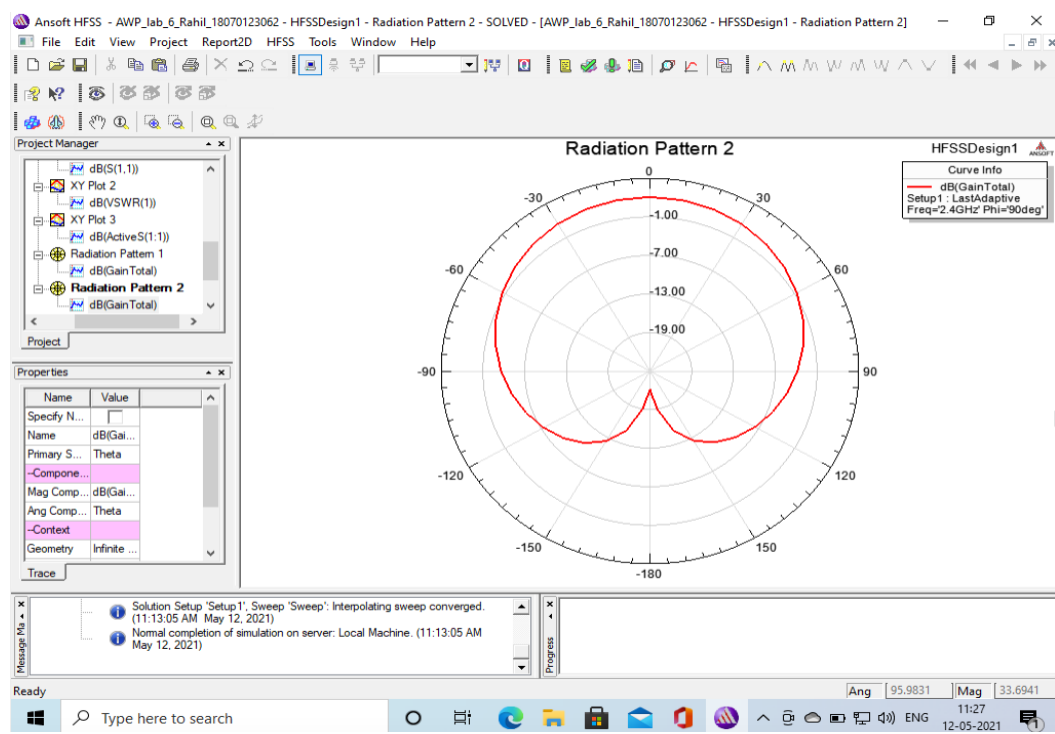

# FINAL GRAPH OUTPUTS:

## 1. S-Parameter:

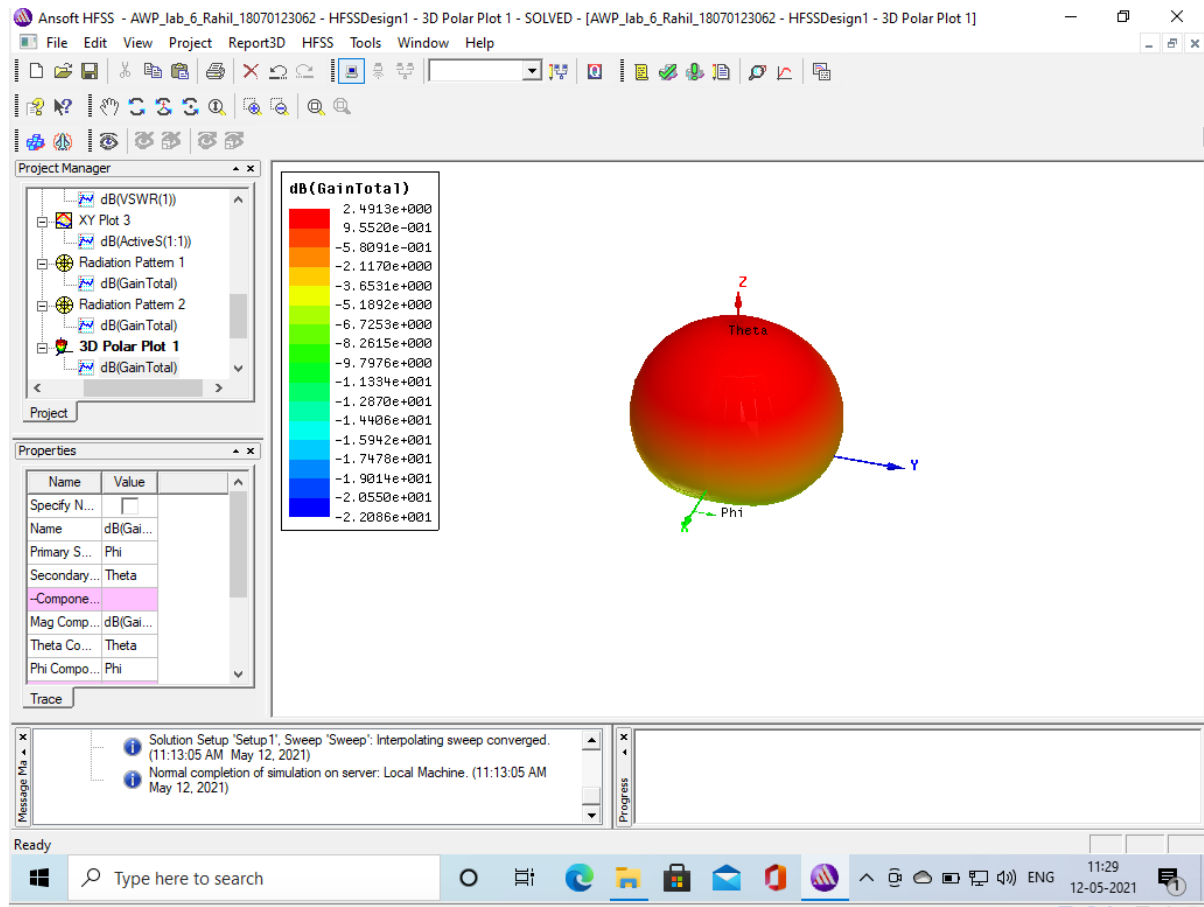

## 2. Radiation Pattern Plot:

### 3. 3-D Polar Plot:

**CONCLUSION:** From this experiment we have learnt how to design the circular co-axial feed antenna on HFSS software.
